UCLA

Disclosures & CME Credit

We have no disclosures.

- Neither the case presenter not the didactic presenter have conflicts of interest
- Off label use of medications may be discussed
- Project ECHO is supported through funding from the SC State Targeted Response Grant (MUSC-STR-17) through the 21st Century Cures Act (TI080221).

– The Medical University of South Carolina designates this live activity for a maximum of 1.0 *AMA PRA Category 1 Credit(s)™.* Physicians should claim only the credit commensurate with the extent of their participation in the activity.

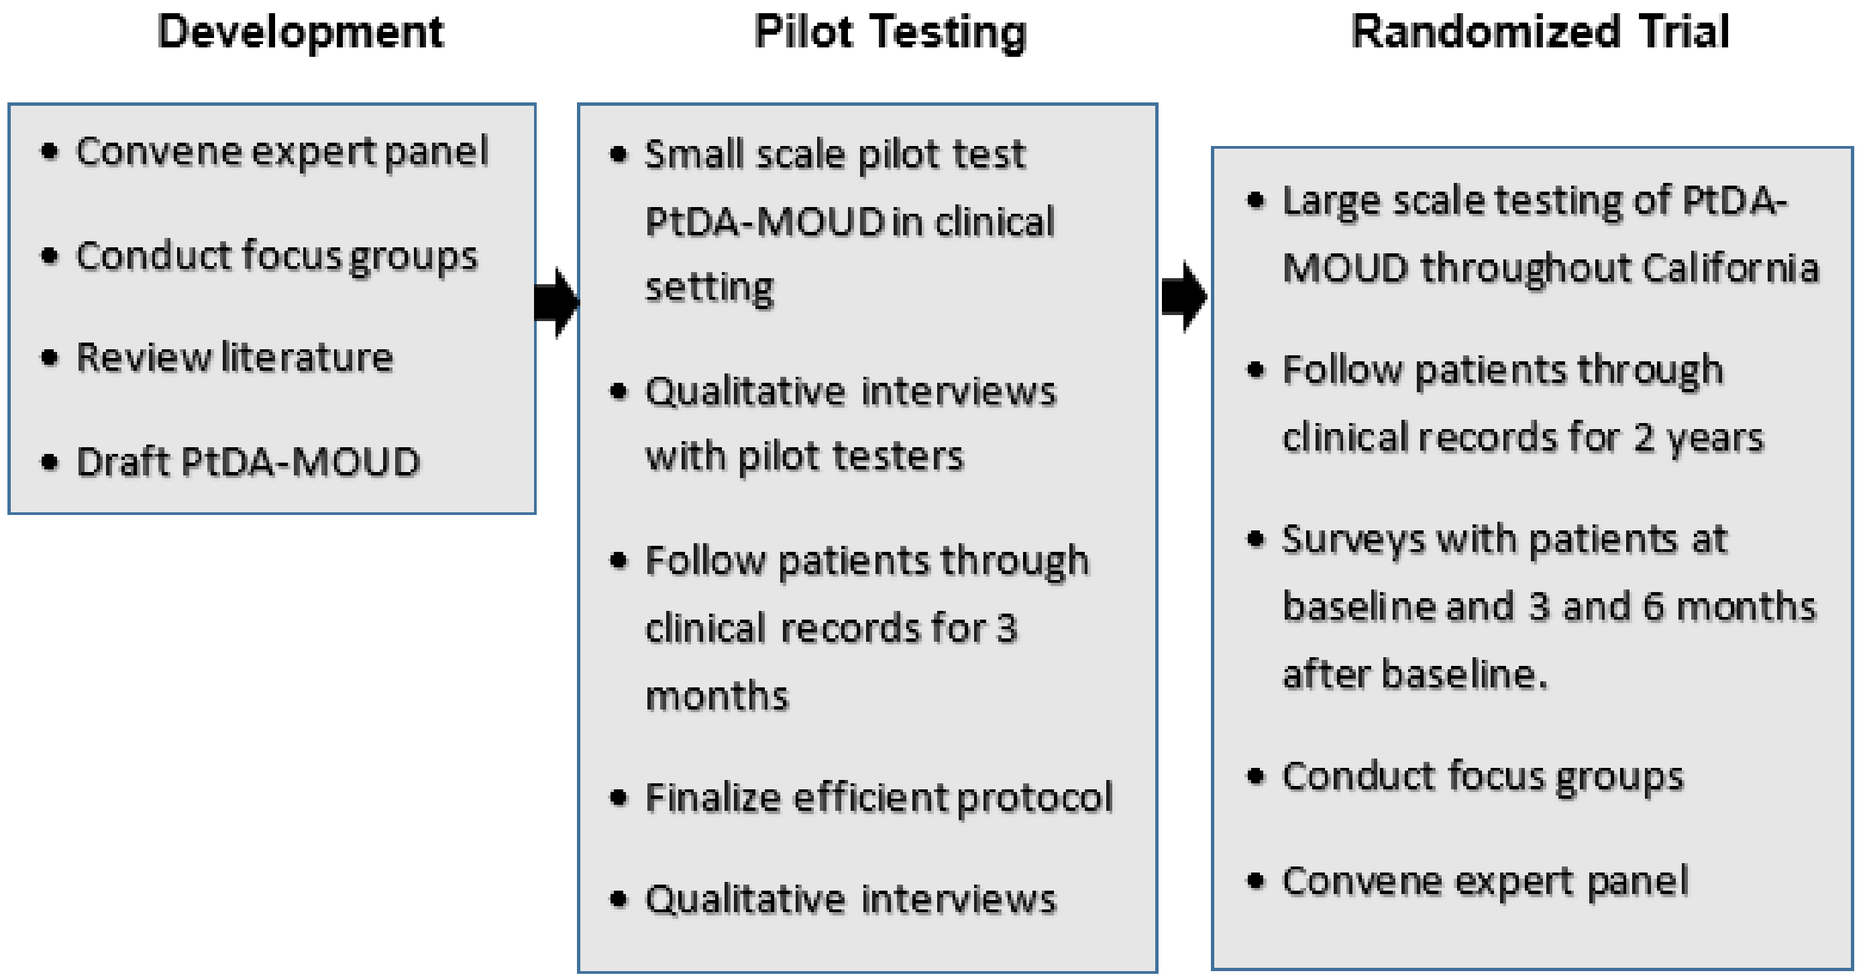
– The Medical University of South Carolina is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

– In accordance with the ACCME Essentials & Standards, anyone involved in planning or presenting this educational activity will be required to disclose any relevant financial relationships with commercial interests in the healthcare industry. This information is listed below. Speakers who incorporate information about off- label or investigational use of drugs or devices will be asked to disclose that information at the beginning of their presentation.

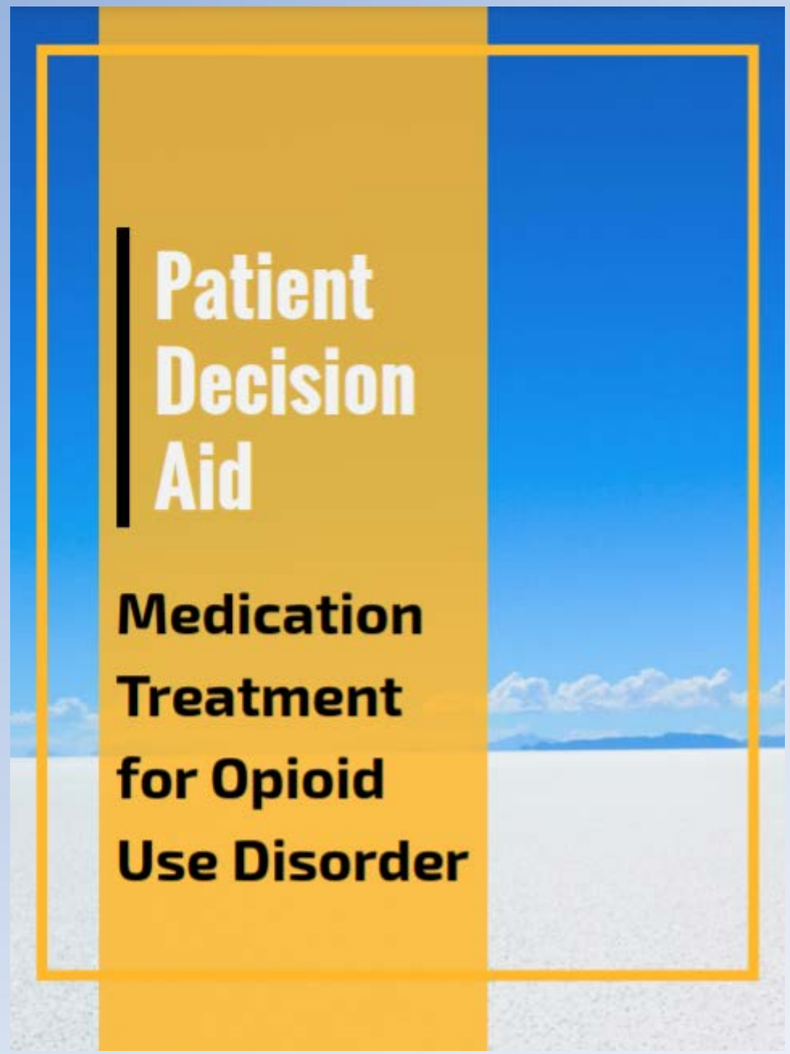
Study Phases

- R21 (developmental phase, 1 year)
  - Compiled best available scientific evidence on MAT
  - Generated an initial draft of PtDA
  - Revised the PtDA based on feedback from patients and clinicians related to clinical priorities, perceived utility, and acceptability
  - Revised PtDA based on other experts in OUD, treatment, & shared decision making
  - Conducting pilot test in local H&S
- R33 (formal trial, 3 years)
  - 15 sites that provide MAT throughout CA

Design for Development and testing of the PtDA



Overview of PtDA



- Takes patient values and preferences into account
- Seeks to increase patients' understanding of possible medications (e.g., risks, benefits, associated outcomes and dispelling myths)
- Generates a clinical profile for clinician review to facilitate MAT intake visit.
  - Note: Not included in current phase of the study due

PtDA Outcomes

- Study hypotheses is that PtDA users will have
  - ☑Improved MOUD retention
  - ☑Reduced opioid use
  - ☑Better outcomes (e.g., improved psychosocial functioning and quality of life)
- Analysis will be complete by May 2023
