

Telehealth at MUSC and in South Carolina:

James McElligott MD MSCR

Associate Professor

Medical Director for Telehealth

Medical University of South Carolina

I have no financial conflicts of interest to disclose.

....the practice of medicine using electronic communications, information technology, or other means between a licensee in one location and a patient in another location.....

-S. 1035: South Carolina Telemedicine Act (2016)

National Trends in Telehealth

U.S. telehealth market, by product, 2012-2022 (USD Million)

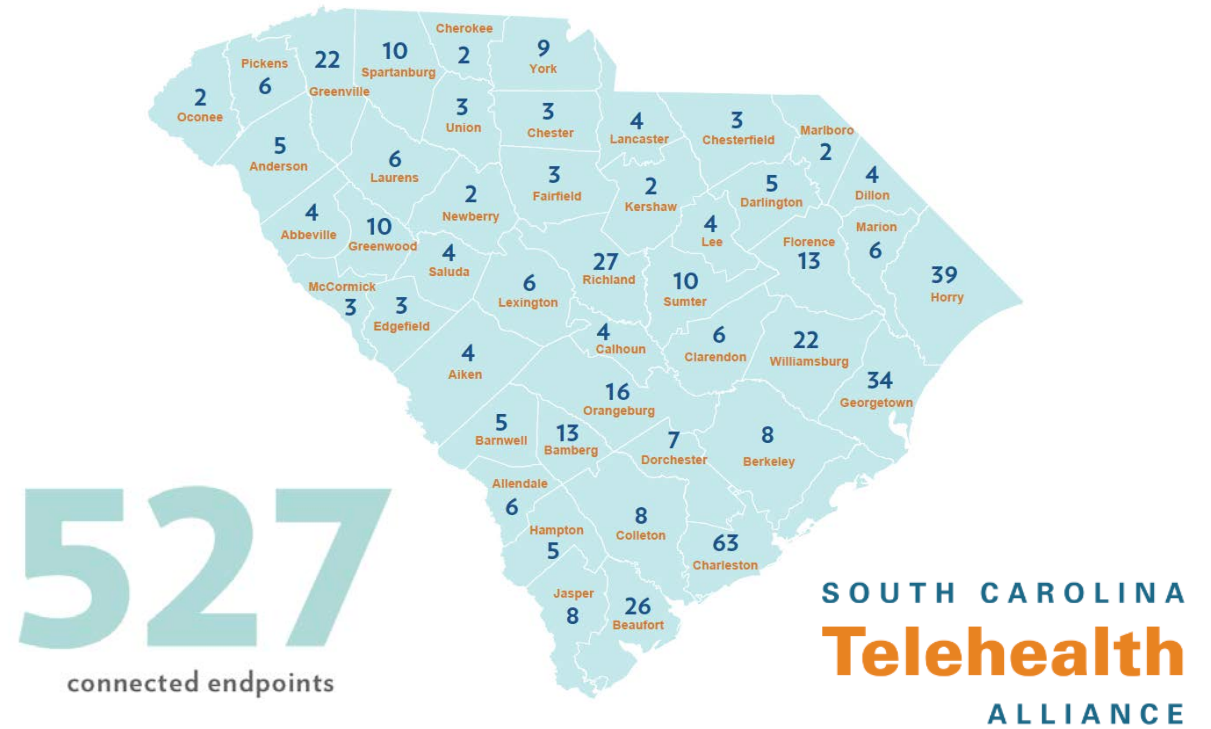

The global market is projected to reach over \$19.5 billion

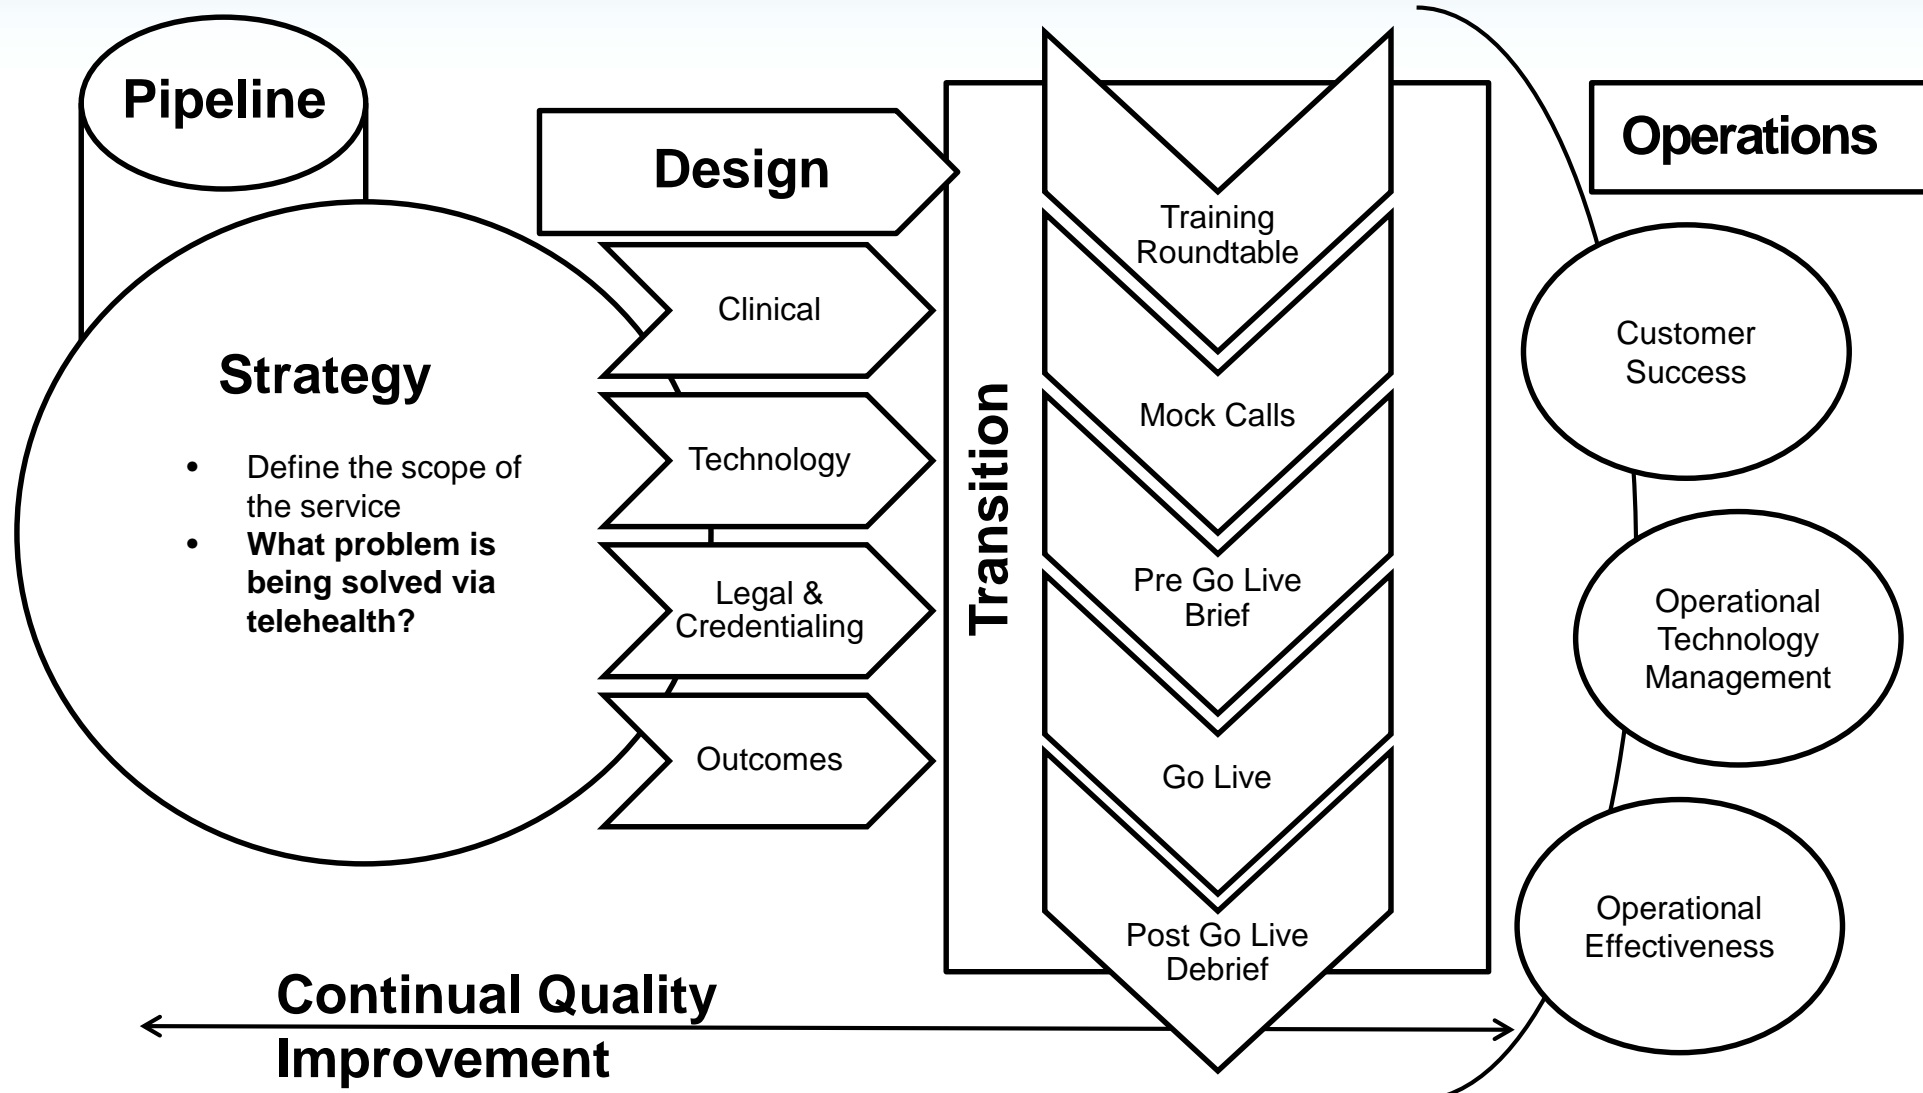

Telehealth for efficient, effective care

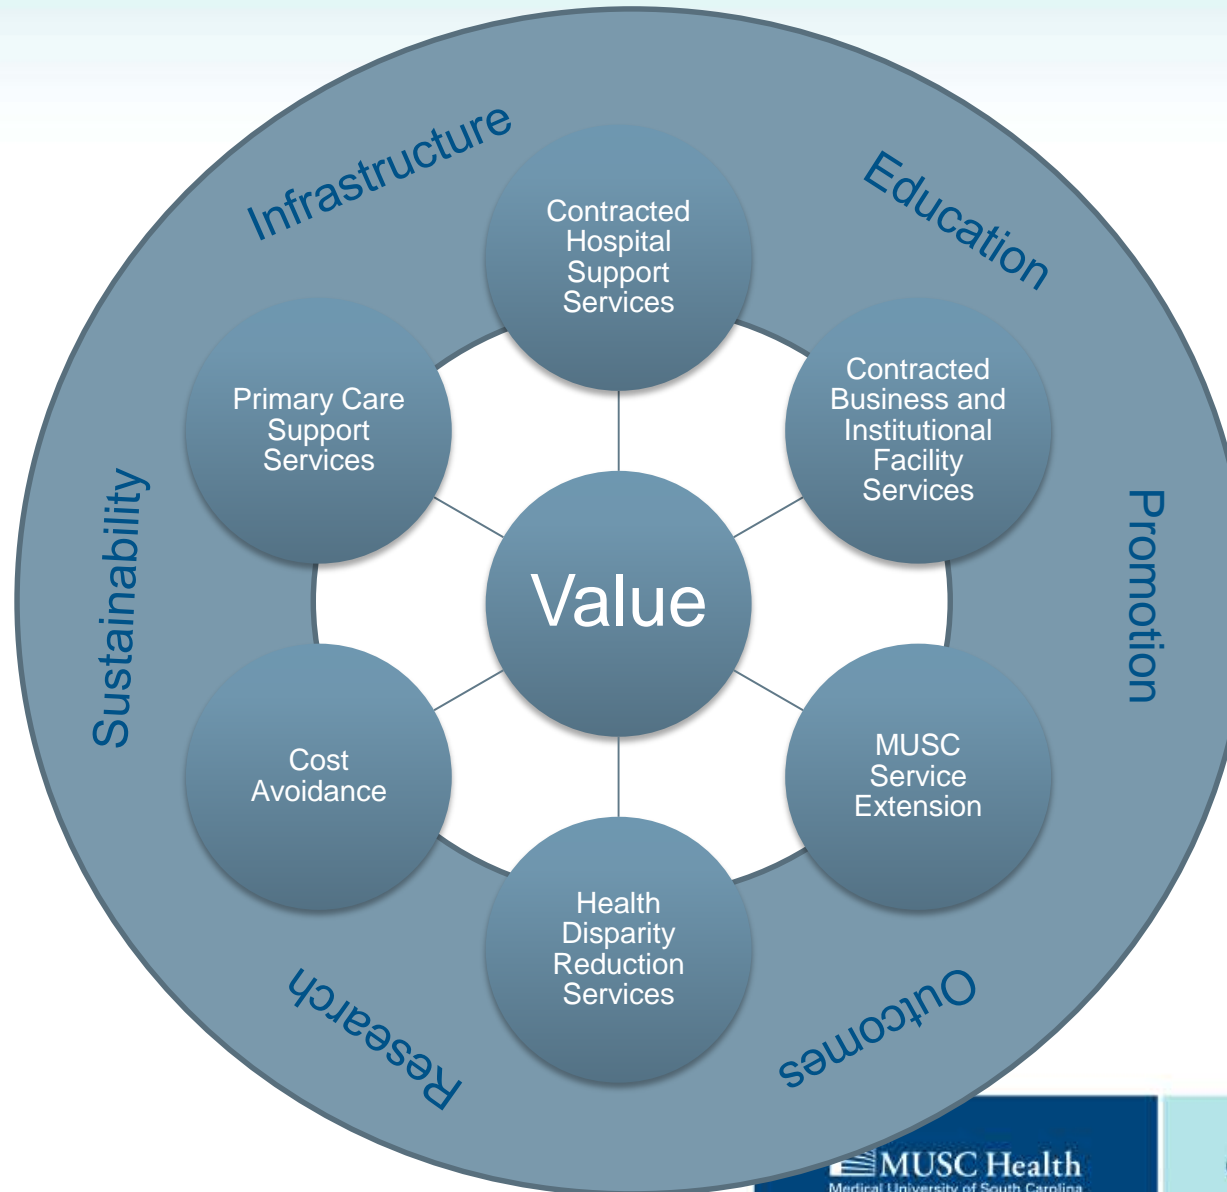

To Improve the health of all South Carolinians

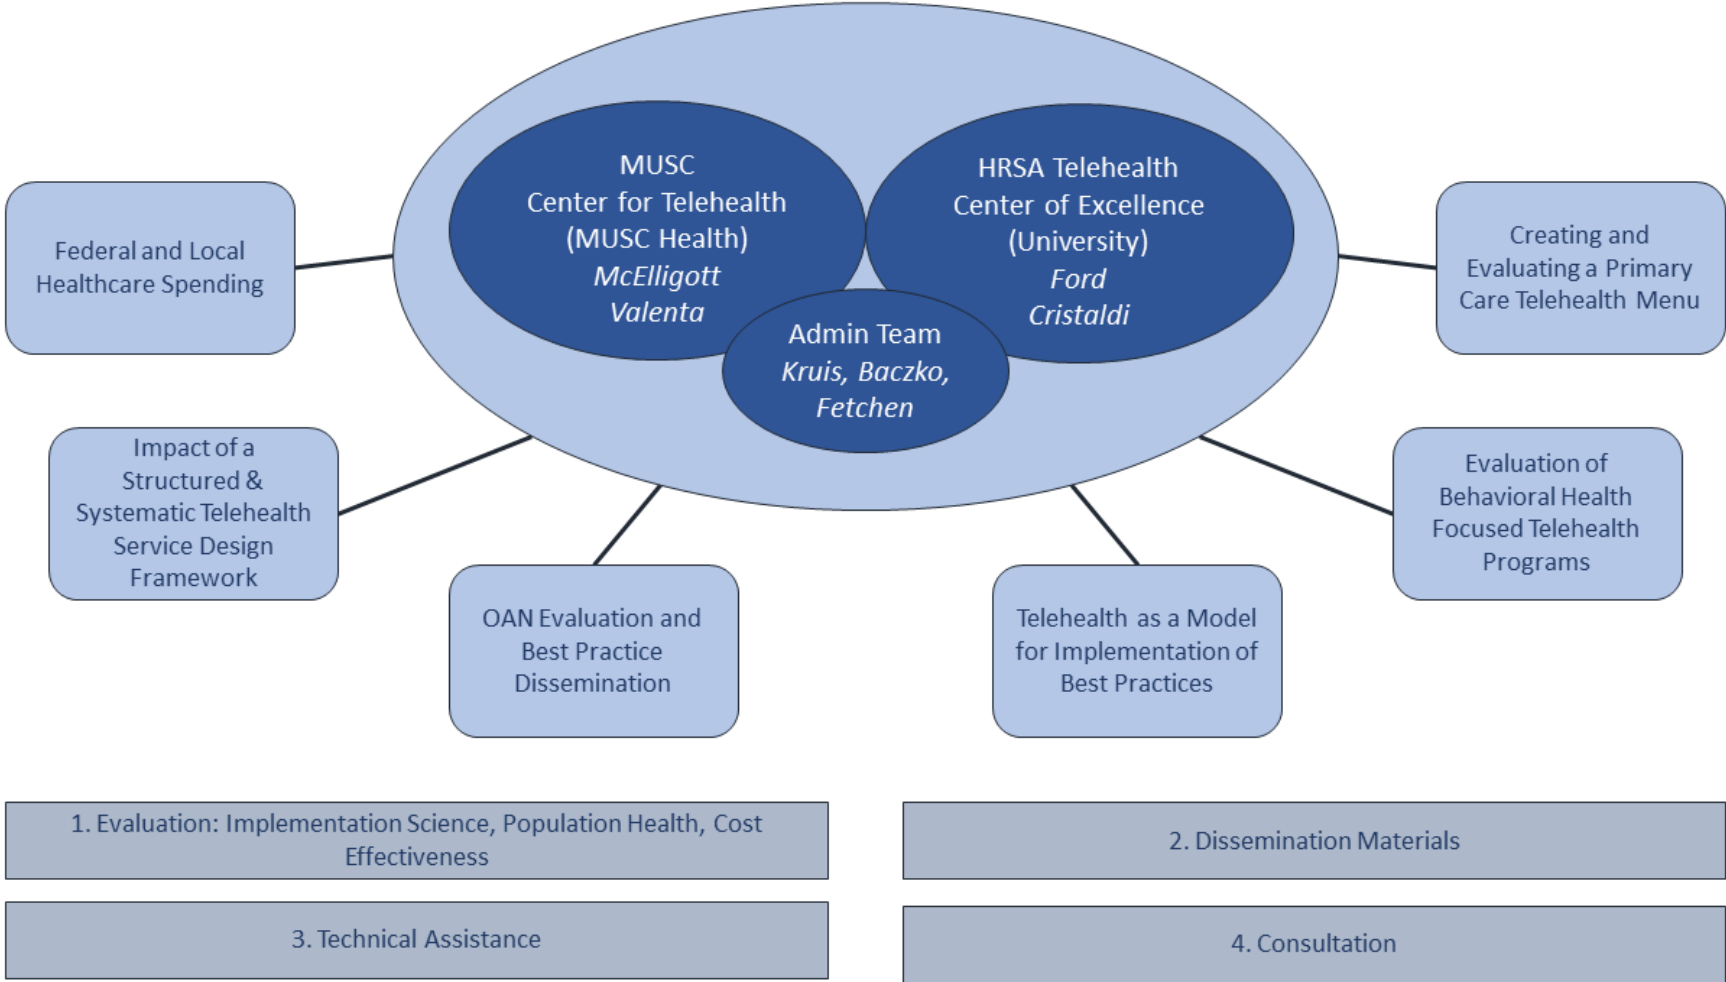

Telehealth Service Implementation Model (TSIM™)

Center for Telehealth Strategies

MUSC National Telehealth Center of Excellence

**Telehealth is happening
every day, all the time in
South Carolina.**

112,000+

Real-time video interactions

348K+

Telehealth patient interactions in 2018

School-Based Telehealth

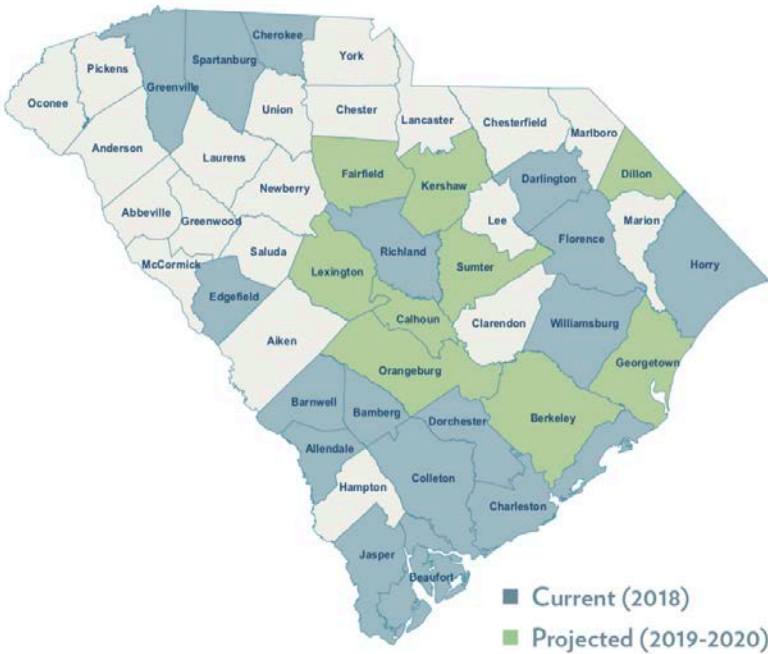

School-Based Telehealth

Number of South Carolina schools with telehealth capability*

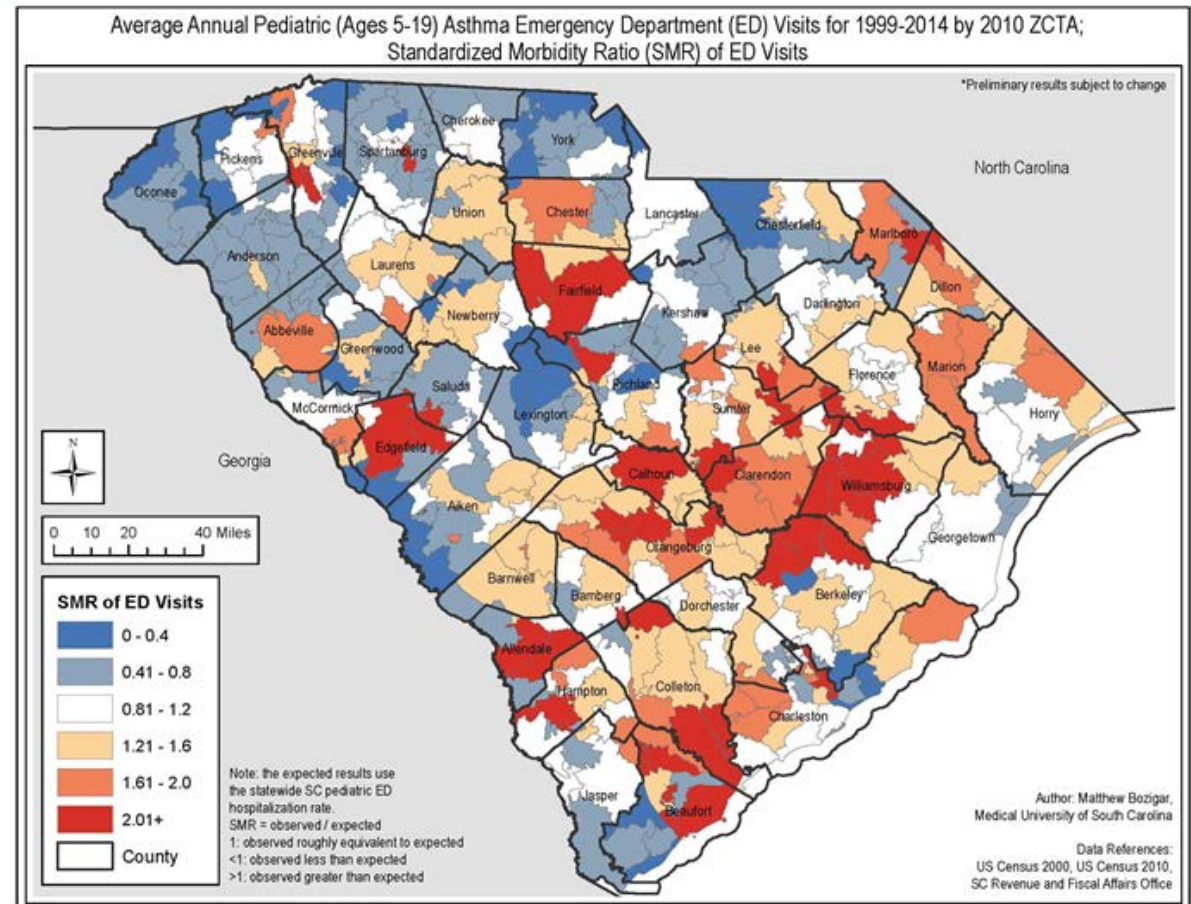

*Services vary by county to include acute care and chronic disease management, mental health, group health education, and individual education plan consultation.

Counties with School-Based Telehealth

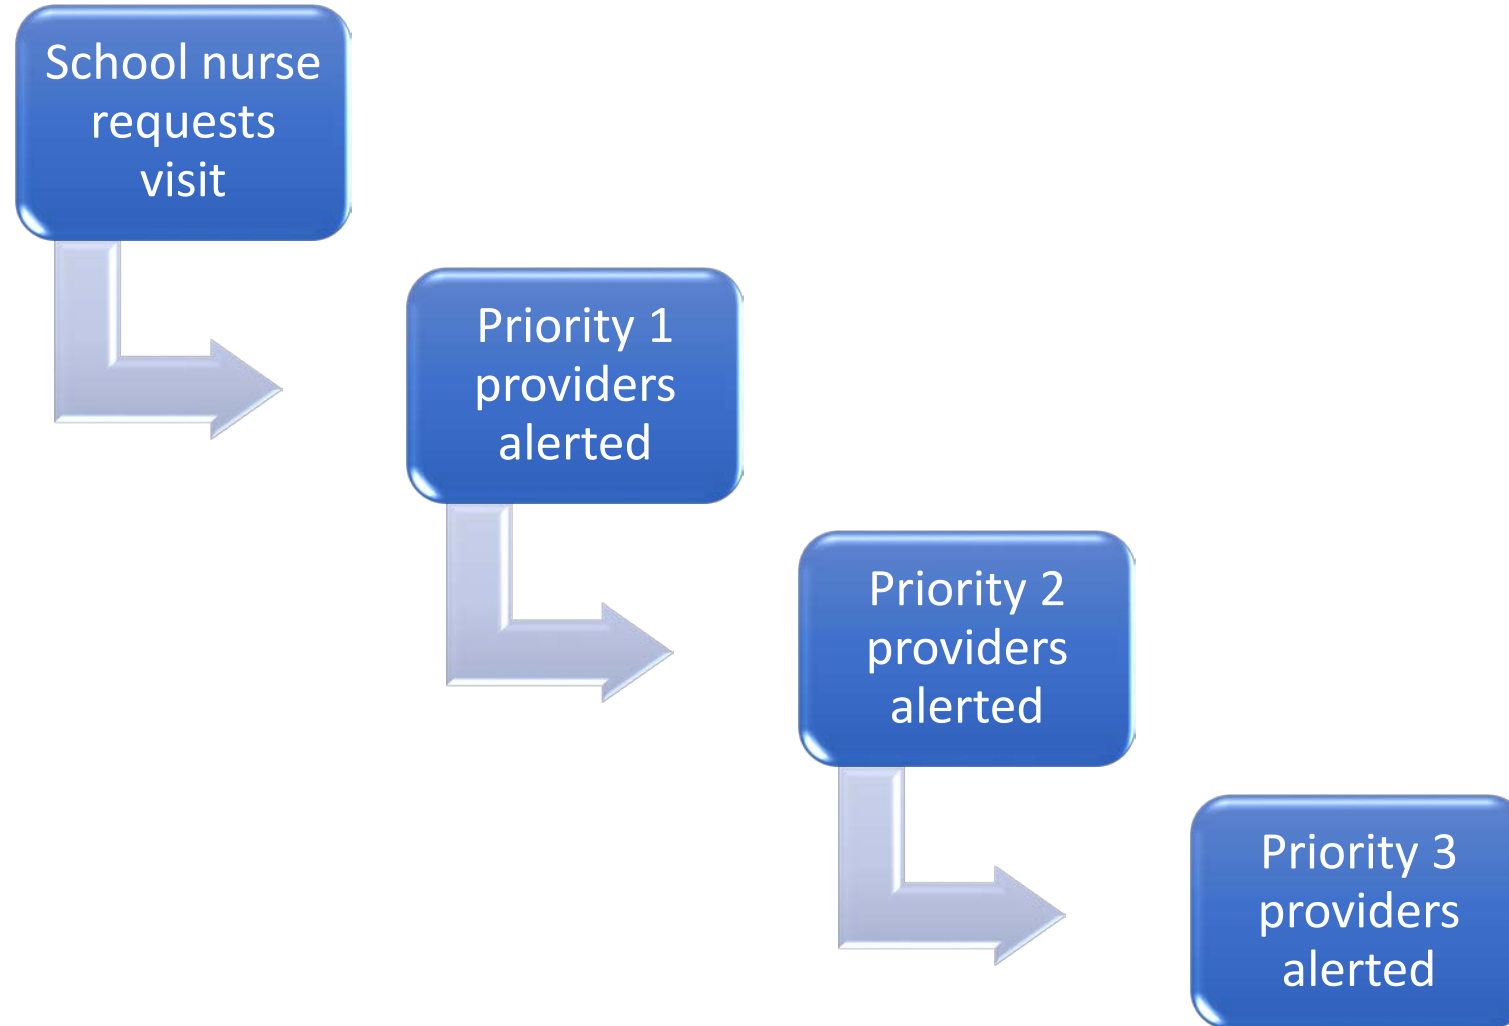

School-Based Telehealth

Demonstrated a **22% reduction** in ED visits for children with asthma

Tiered Call Pool Workflow

Efficiency Metrics: Monthly Snap Shot

Average Provider Response Time	8 minutes 52 seconds
Average Duration of Visit	16 minutes 8 seconds
% of Priority 1 Providers Taking Case	93%
% of Priority 2 Providers Taking Case	7%
% of Priority 3 Providers Taking Case	0%

Hospital-based Care

Partnering for Regional Coverage

Number of Consultations by McLeod Health

Percentage of Patients Transferred to MUSC from McLeod Health

85% telestroke patients remain in their community for treatment

Enables

- Regional "Sub-Hub" partnerships for expedited triage
- Shared staffing across health systems

Managing Across the Continuum of Care

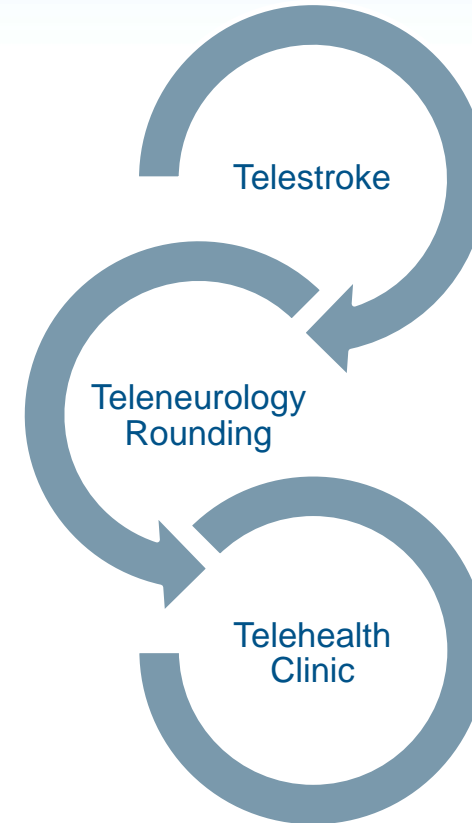

Inpatient teleneurology and EEG services

- Reduced transfer rate (20.2% Vs. 29.4%, $P < 0.001$)
- Cost savings of nearly \$5000 per patient

Telehealth Follow-Up Clinic

- Dedicated virtual clinic with regional affiliate health systems

The Impact Of Inpatient Teleneurology Follow Up Consults For Acute Stroke Patients on Transfer Rate and Cost-Reduction

Best practices and Quality Data Sharing

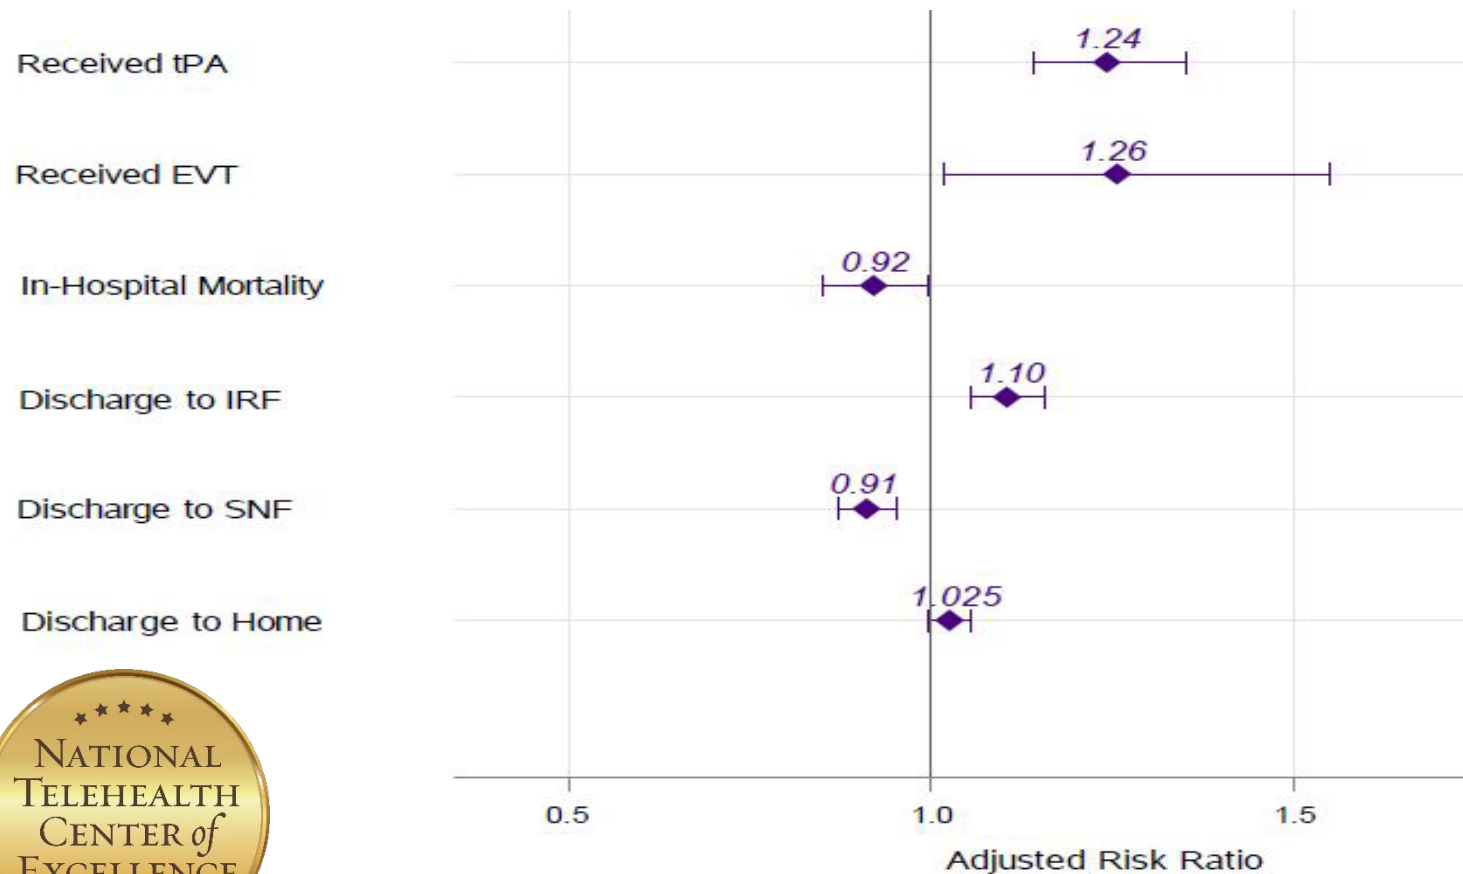

Sharing of anonymous process metrics

- Ongoing data monitoring
 - tPA delivery times
 - Post tPA process checks
 - Administrative compliance
- Monthly reporting
 - Door-In-Door Out Report
 - Bleed rates
 - Length of stay
 - Disposition and discharge NIHSS
- Quarterly
 - Blinded data sharing across sites
 - Stroke rates and tPA delivery %
 - Transfer rates
 - Thrombectomy rates
 - 90 Call Backs

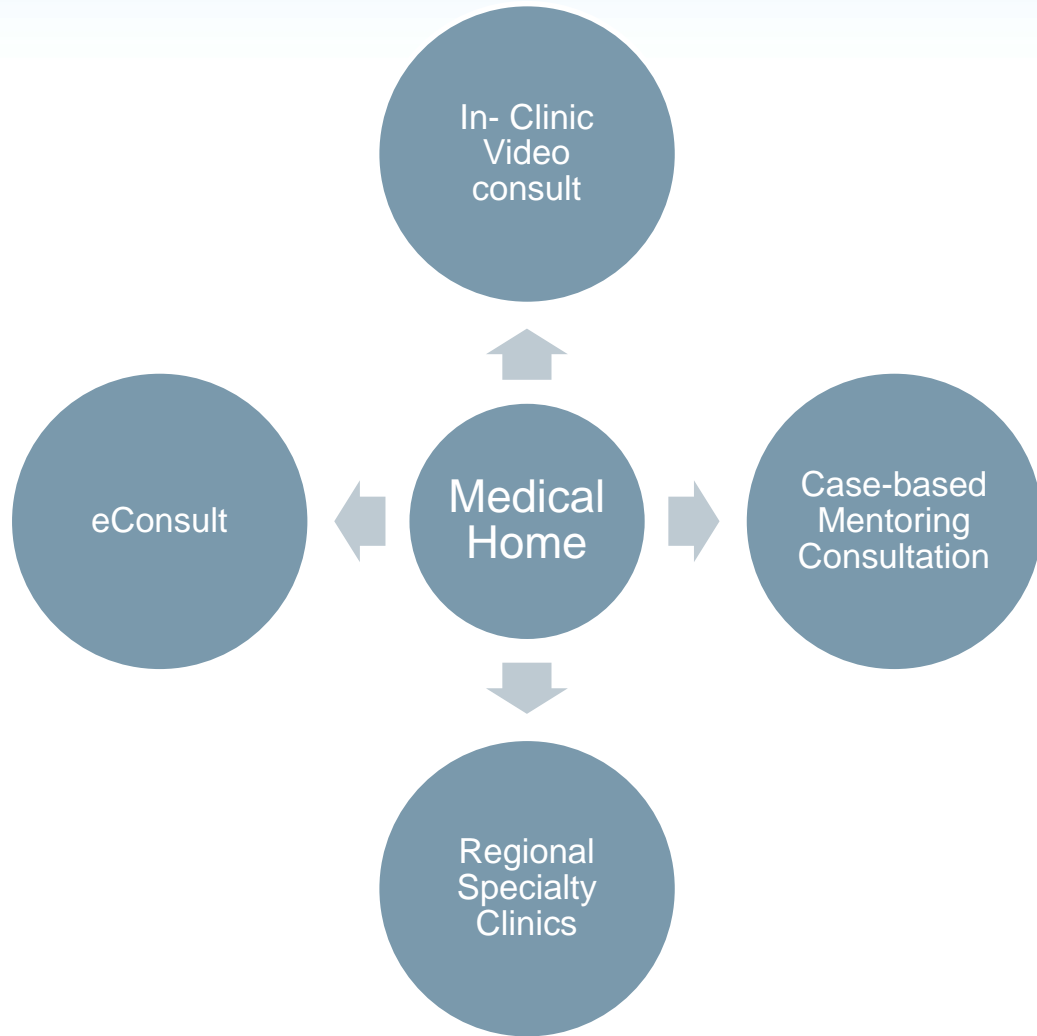

Focus on Outcomes

Impact of Telestroke Exposure on Outcomes
Adjusted Relative Risk Ratio and 95% CI

Telehealth in the Medical Home

Telehealth in the Medical Home

Annual Number of Outpatient Consultations

1,700+
consultations

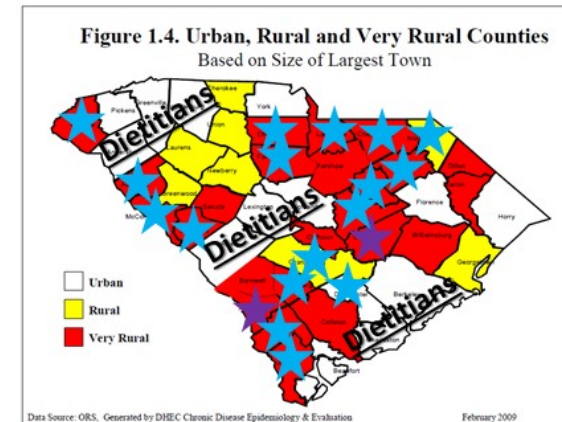

OT Nutrition Services

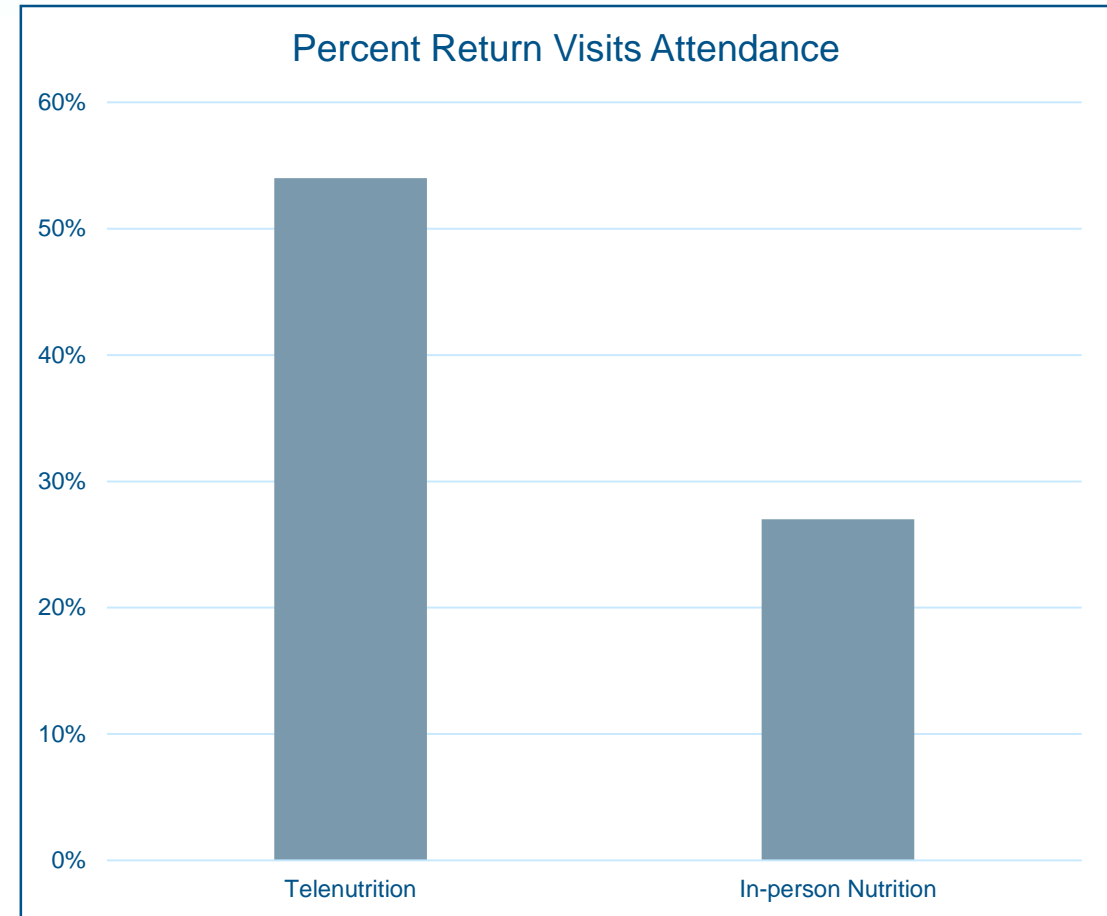

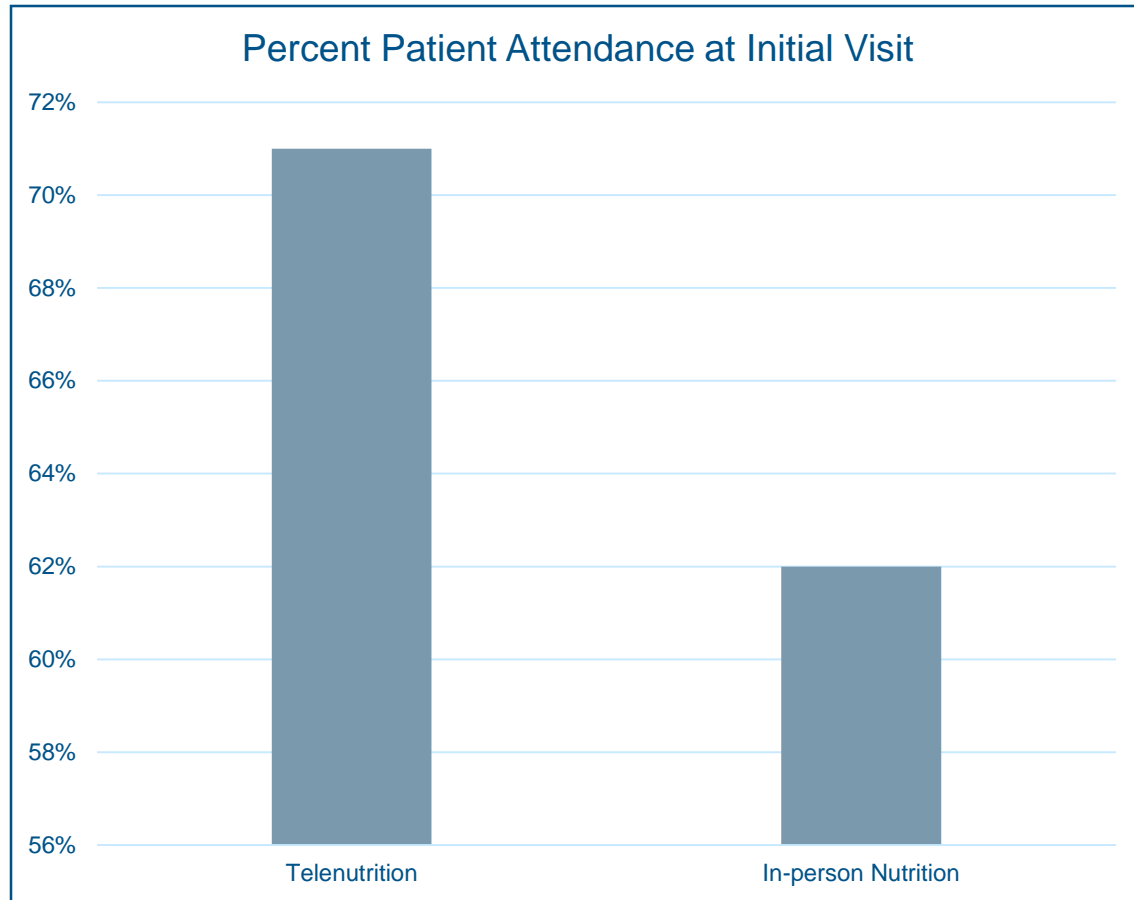

- Allows providers to collaborate and bring specialty care to patients in need.
- Reduces barriers by allowing space easily accessible to both patient and provider.
- Services are available to both pediatric and adult populations.
- Most Registered Dietitians live and work within the 3 major metros

★ = 80% or more of this county's adults are overweight or obese

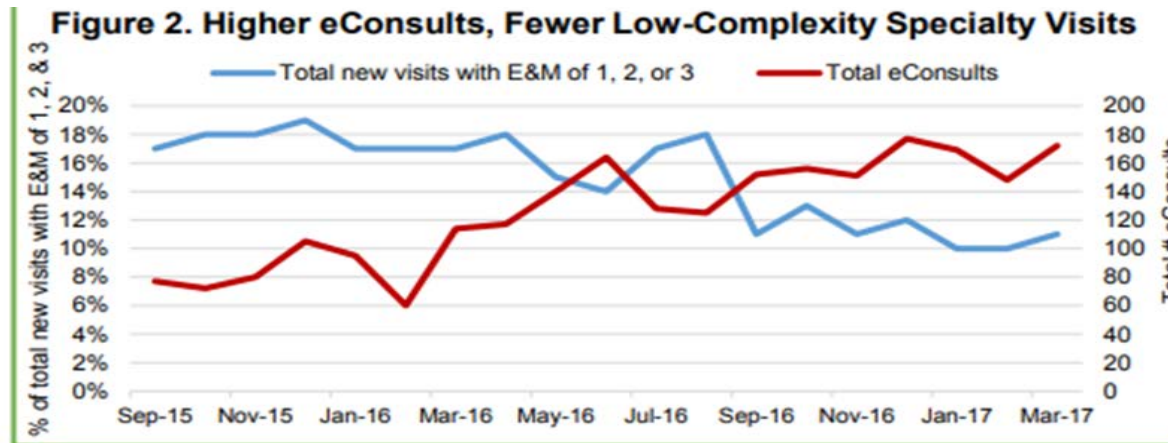

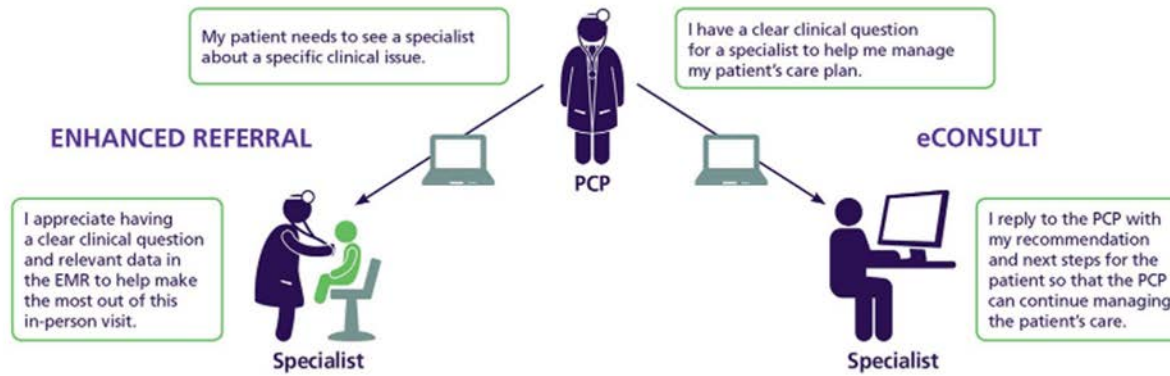

★ = 70% or more of this county's adults are overweight or obese
