ADMISSION TO CANDIDACY

Upon approval of the research proposal, the student will be certified as a candidate for the M.S. degree. Such admission to candidacy must occur at least three months prior to completing requirements for the degree.

The graduate school recognizes that the student's research may deviate substantially from that originally proposed. The student should be encouraged to pursue promising leads; however, long term changes in the direction of the student's research should be done in consultation with the advisory committee.
