

## Jeffrey Wessell, D.O.

**Start Date:** 7/1/2017

**End Date:** 6/30/2024

### **Education**

Nova Southeastern University College of Osteopathic Medicine, D.O., 2017  
Boston University, B.A., Neuroscience, B.S., Health Science, 2011

### **Clinical Interests**

Pediatrics, Complex Spine

### **Research Interests**

Neurocritical care, medical device development

### **About Jeffrey Wessell**

#### **Why did I choose to train at MUSC?**

I was originally captivated by the city of Charleston and how beautiful it is here. When I met the residents and staff there was an emphasis on teamwork and building a great learning environment. Seeing how well everyone interacted with each other spoke volumes to me about the program. The caseload is high and I knew my exposure to a variety of disease processes here would afford me the opportunity to become a good surgeon.

#### **What do you enjoy most about your residency program?**

The most important part is that we have each other's back, if we did not, then residency in neurosurgery would be infinitely harder.

#### **When I'm not at work you can find me ...**

Spending time with my girlfriend or my Boston terrier, working out, or enjoying Charleston's foodie scene.
