

Laura Wolgamott, M.D.

Start Date: 7/1/2017

End Date: 6/30/2024

Education

Wright State University - Boonshoft School of Medicine, M.D., 2017

Denison University, B.S., Biology, 2011

Clinical Interests

Cerebrovascular, Skull Base

Research Interests

Aberrant molecular signaling pathways in cancer cell lines, cerebrovascular accidents

About Laura Wolgamott

Why did I choose to train at MUSC?

Although I am not originally from the Charleston area, I found myself attracted to the idea of working with the current staff and residents at MUSC. I found the work atmosphere to be highly motivated and productive, but not to the point of burnout or malignancy. Furthermore, I learned that the operative experience was very significant and excellent. Overall, MUSC met my criteria for what I was looking for in a training program.

What do you enjoy most about your residency program?

In my short experience so far, I most enjoy the people I work with. I have already fostered a healthy rapport with my co-residents and the majority of the faculty. It certainly makes it easier to come in bright and early when I have good people to go to work with.

When I'm not at work you can find me ...

Out with my dog, Kirb, getting food and drinks with friends, or doing outdoor activities like biking, climbing, or running.
