

## YOU WANT TO GIVE YOUR CHILD THE WORLD

Childhood is a time of magical moments and playful discovery. You want your child to reach every milestone and enjoy every moment. Help your child connect to their world with Sky CI™ M sound processor, the world's first cochlear implant sound processor designed specifically for children.

Built for your child's evolving needs—from learning to talk as a baby to hanging out with friends as a teen—Sky CI M will ensure your child stays connected to all that life has to offer.

## POWERFUL HEARING EXPERIENCE

AutoSense Sky OS™ 3.0 operating system is **uniquely designed with typical children's listening situations** in mind, adjusting and optimizing your child's sound processor automatically wherever they go.

Taking advantage of the established Phonak Marvel technology, Sky CI M provides **excellent sound quality and consistent access to the sounds** in your child's environment, so they can always be a part of the conversation.

The Roger™ technology and Bluetooth® connectivity allows for **streaming all day with no extra accessories** for your child to wear on the sound processor, so the focus is on the teacher's voice at school or their favorite music playlist at home.

### Roger™ Technology

Use Roger in challenging listening situations such as the classroom to boost your child's hearing performance.

## FLEXIBILITY FOR YOUR GROWING CHILD'S ADVENTURE

Sky CI M comes in a variety of stylish, **child-preferred colors**. When your child gets to choose the color of their devices, they may be more likely to wear them and get more benefit out of them.

The M Waterproof Battery and Slim HP AquaMic™ headpiece are **swim class and bathtub ready**, so your child doesn't have to miss out on any fun or learning.

AB knows little ears. That's why Sky CI M comes with a **variety of wearing options** that can be customized to the changing needs of your growing child.

### Behind the Ear

Great for those who want an out-of-the-way system.

### Safe on the Ear

Ideal for keeping it safe and secure on the ear with our Sky CI M retention options.

### Nothing on the Ear

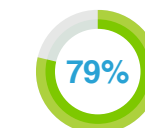

For small ears and active children – clip it on.

## ULTIMATE EASE OF USE

AutoSense Sky OS 3.0 automatically adapts to sound wherever your child goes **without the need for manual adjustments**, so they can focus on what's important.

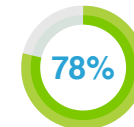

Your child can enjoy their favorite devices. Video calls with family and friends, movies and music, and educational apps can all be **streamed directly and wirelessly** to their ears.

**Schools have adopted wireless devices in education.\***

79% of surveyed schools reported use of tablets in school.

**Tablet and smartphone use is widespread among children.\***

78% of elementary school students report that they regularly use a tablet or smartphone.

The **AB Remote app** gives you convenient control and management of your child's hearing devices, until they're ready to do it on their own.

## A PARTNER FOR YOUR CHILD'S HEARING JOURNEY

Together with Phonak, one of the world's leading providers of hearing aid solutions, Advanced Bionics is working to ensure that each of your child's unique needs are met.

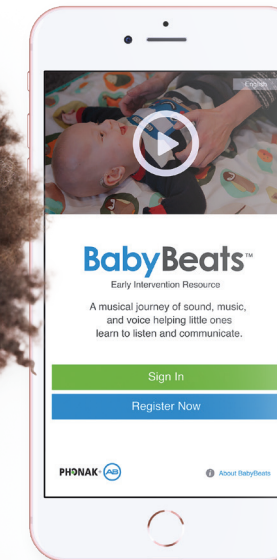

If your child will use a cochlear implant and a hearing aid, the Sky CI M and Phonak Sky™ Link M hearing aid are designed to work together as a dynamic pair.

Unlike other solutions, these two devices will process sounds the same way, providing a **consistent sound quality even in challenging listening situations.**

The BabyBeats app and HearingSuccess portal, [HearingSuccess.com](http://HearingSuccess.com), are helpful tools specifically designed by our researchers and experts to **help your family maximize your child's success.**

So, whether you are trying to stimulate your baby's brain for listening, or help your teen get the most out of their device, we are here for you.
