

Announcing the
South Carolina Learning Collaborative on
Trauma-Focused Cognitive-Behavioral Therapy - 2021

Project BEST (www.musc.edu/projectbest) will conduct the SCLC-2021, a 10-month clinical learning collaborative on TF-CBT for mental health treatment providers serving abused and traumatized children and youth in South Carolina.

PLEASE NOTE: Due to COVID-19, training will be conducted via a VIRTUAL platform – stay tuned for details.

WHO:

The learning collaborative is intended for therapists and clinical supervisors possessing a clinical masters or doctoral degree in a mental health profession who do psychotherapy with abused and traumatized children and youth in South Carolina. Participants may include clinical social workers, professional counselors, psychiatrists, clinical psychologists, marriage and family therapists, clinical nurse specialists, and other mental health professionals. Since all training will be done virtually, the SCLC-2021 is limited to **25** participants. Preference will be given to participants from organizations that previously participated in a Project BEST community-based or clinical learning collaborative.

WHAT:

Trauma-Focused Cognitive-Behavioral Therapy (TF-CBT) is the most well-supported, evidence-based treatment for children/youth and their caregivers who have experienced or been exposed to abuse, violence, or other potentially traumatic events, and who have clinically significant problems as a result. Participating clinicians will learn to deliver TF-CBT with high clinical competence and adherence to the treatment model from nationally approved TF-CBT trainers. The SCLC-2021 will consist of multiple training activities, components, and modalities, including:

- 1) Self-directed readings and the online webcourse, TF-CBTWeb 2.0 (Registration is included, a \$35 value.)
- 2) 2 Learning Sessions – each will be 3 half days, via a virtual platform (This will be the same hours of training as had been offered via the in-person training sessions)
- 3) 14 one-hour clinical case consultation calls over 7 months on TF-CBT training cases
- 4) Collection and use of clinical assessment, fidelity, service delivery, and implementation tools and metrics.

Clinical training is led by nationally approved TF-CBT trainers.

Participants completing all SCLC-2021 training requirements will:

- 1) Receive a Certificate of Completion from Project BEST
- 2) Receive up to 35 continuing education contact hours
- 3) Be listed on the Project BEST Roster of Trained Professionals (www.musc.edu/projectbest)
- 4) Will have met the training and clinical consultation call requirements for National Certification in TF-CBT (see www.tfcbt.org for more information about other requirements).

Save the Dates!!

WHEN

August 31, 2020 – Registration Opens; September 18, 2020 – Registration Closes
