BACKGROUND

- Residency interview days typically include a pre-interview social event, interviews with faculty, and lunch or tour with current residents- activities that contribute to assessing program "fit"
- The COVID-19 pandemic launched the shift to an entirely virtual interview platform
- This study focused on applicant behaviors and values assessed through a post-interview survey

METHODS

- An anonymous, investigator-generated online survey was distributed to categorical general surgery residency interviewees at our institution for the Match 2021 and 2022 cycles
- Surveys consisted of a combination of yes/no, 5-point Likert scale style, ranking values, and free response to capture the applicants' experience and perspective
- Data were analyzed using chi-square and paired t-tests

- 135 applicants (56) survey, 50.3% Ma
- Median number of Match 2021 and 1 (IQR 13-20)
- 54.8% (n=74) app 53.3% (n=72) acc because they were
- 27.4% (n=37) app geographic region
- 90.0% (n=54) of 2 visiting programs
- 20% of applicants did not receive an the programs they
- 57% (n=77) report presented an incre Table 1 qualitative

Less bias

"Virtual interview allows similar str

"I think that physical appearance p interviews may be more accessible

"Does not discriminate based on a locations."

General Surgery Applicant Perspectives: A two-year cohort of virtual interview experiences and supplemental application impressions

TS				RESULTS continued
 52% of Match 2021 app comfortable ranking pro their interview day. 58% 	grams	based		The opportunity for an in-person second look is helpful for making my rank decisions
 Top benefits and top lim reported in Table 2 	itation	s are		Second look is an advantage to the applicant more than the residency program
Virtual Interview Benefits	2021 Cohort	2022 Cohort	Mean	The supplemental application is worth my time because it improves my application
Saves Money	96%	96.7%	96.3%	0% 10% 20% 30% 40% 50% 60% 70%
Saves Time	45.3%	55%	49.6%	Percent of applicants who agree/strongly agree
No transportation, weather, or travel issues	41.3%	46.7%	43.7%	Figure 1. Applicants share common views recent changes to the Match process
Virtual Interview Limitations	2021 Cohort	2022 Cohort	Mean	CONCLUSIONS
nability to observe faculty, residents, and staff interactions	61.3%	51.7%	57%	 Time and money saved were clear benefits, while inability to observe
Exposure to current residents and faculty	57.3%	66.7%	61.5%	interactions and lack of exposure w
Difficulty comparing programs	57.3%	58.3%	57.8%	significant dissatisfiers
