

Surgery Diagnoses and Procedures Log AY13-14

Surgery 3rd Year Clerkship Operations and Procedures Log

This log is to identify the specific clinical experiences you encounter during the rotation. You must see or perform each of these required clinical experiences in order to complete this course successfully. Nearly all of these conditions are readily available as both a **Direct Care or Team Care** experience throughout the clerkship.

Direct Patient Care is defined as “a student will at a minimum complete a SOAP note or a History and Physical Exam document in the course of caring for this patient.” **Team Care of the Patient** is defined as “a student will participate in the care of the patient with team members in the context of rounding, consulting, ambulatory visits, etc.” Please contact your Clerkship Director with any questions regarding specific patient experiences.

You must alert your attending/resident and/or the clerkship director by midpoint to obtain help if any one of these conditions cannot be identified. Assistance will be given. Each clerkship has a list of appointed alternate mechanisms for achieving each condition, but these should only be used when the condition cannot be completed in the clinical setting.

Note: All Operations and Procedures in the Surgery Clerkship are **REQUIRED** and will need to be accomplished by the end of the clerkship rotation. **ALL** of these diagnoses and procedures should be seen in Direct Patient Care.

Each time you enter your Operations or Procedures please hit the **SAVE FOR LATER** button when exiting the system. On completion of all required Operations and Procedures OR the last day of your clerkship please hit the SUBMIT button.

Required Procedures: All are **REQUIRED**; Should be seen in Inpatient setting.

Assist with closure of an abdominal or thoracic incision (Question 1 of 32 - Mandatory)

Completed Did not complete

Assist in prep and drape of a patient (Question 2 of 32 - Mandatory)

Completed Did not complete

Assist with anesthesia for a major surgical procedure (Question 3 of 32 - Mandatory)

Completed Did not complete

Change a wound dressing (Question 4 of 32 - Mandatory)

Completed Did not complete

Observe a process of informed consent (Question 5 of 32 - Mandatory)

Completed Did not complete

Revised and approved on 5-13-13

Remove a drain (Question 6 of 32 - Mandatory)

Completed Did not complete

Remove sutures or staples (Question 7 of 32 - Mandatory)

Completed Did not complete

Tie a knot in a suture on a patient (Question 8 of 32 - Mandatory)

Completed Did not complete

Complete perioperative care web based scenario (Question 9 of 32 - Mandatory)

Completed Did not complete

Discuss a blood gas result with a resident or attending (Question 10 of 32 - Mandatory)

Completed Did not complete

Obtain Midterm rotation feedback from chief resident or attending (Question 11 of 32 - Mandatory)

Completed Did not complete

Perform a literature search on a surgical question (Question 12 of 32 - Mandatory)

Completed Did not complete

Assist in OR for Laparoscopic or Thoracoscopic Procedure (Question 13 of 32 - Mandatory)

Completed Did not complete

Recommended Procedures: May be in Inpatient or Outpatient setting.

Write a TPN on enteral nutrition order (Question 14 of 32 - Mandatory)

Completed Did not complete

Assist in OR for procedure requiring cardiopulmonary bypass (Question 15 of 32 - Mandatory)

Completed Did not complete

Write an IV fluid order (Question 16 of 32 - Mandatory)

Completed Did not complete

Participate in Surgical Management for Patient < 2 years of age (Question 17 of 32 - Mandatory)

Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery)
PREFERRED

Web based case simulations (Each of 2 Pediatric Scenarios)

Did not complete

Required Diagnoses: All are **REQUIRED**; May be in Inpatient or Outpatient setting.

Abdominal wall hernia (Question 18 of 32 - Mandatory)

- Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
- Web based case simulations (Each of 2 Hernia Scenarios)
- Did not complete

Breast lesion (Question 19 of 32 - Mandatory)

- Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
- Web based case simulations (Each of 3 Breast Scenarios)
- Did not complete

Abdominal Pain (Question 20 of 32 - Mandatory)

- Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
- Abdominal Pain Small Group Discussion
- Web based case simulations (Each of 6 Abdominal Pain Scenarios)
- Did not complete

Traumatic Injury (resuscitation and/or operation) (Question 21 of 32 - Mandatory)

- Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
- Simulation Session Participation
- Web based case simulations (Each of 3 Trauma Scenarios)
- Did not complete

Peripheral Vascular Disease (Question 22 of 32 - Mandatory)

- Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
- Peripheral Vascular Disease Small Group Session
- Web based case simulation (Peripheral Vascular Disease Scenario)
- Did not complete

Morbid Obesity (Question 23 of 32 - Mandatory)

- Direct Patient Care
- Did not complete

Tumor other than breast (Question 24 of 32 - Mandatory)

- Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
- Cancer Small Group Session
- Web based case simulation (Each of 3 Tumor Other Than Breast Scenarios)

<input type="radio"/> Did not complete
Gallstones and/or Biliary Tract Pathology (Question 25 of 32 - Mandatory)
<input type="radio"/> Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
<input type="radio"/> Jaundice Small Group Session
<input type="radio"/> Web based case simulations (Jaundice Scenarios)
<input type="radio"/> Did not complete
Recommended Diagnoses: May be in Inpatient or Outpatient setting
Chronic Organ Failure Requiring Transplant (Question 26 of 32 - Mandatory)
<input type="radio"/> Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
<input type="radio"/> Team-based care of pre/postoperative patient
<input type="radio"/> Did not complete
Surgically Correctable Cardiac Disease (Question 27 of 32 - Mandatory)
<input type="radio"/> Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
<input type="radio"/> Team-based care of pre/postoperative patient
<input type="radio"/> Did not complete
Anal Pathology (Question 28 of 32 - Mandatory)
<input type="radio"/> Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
<input type="radio"/> Web based case simulations (Anorectal Pain Scenario)
<input type="radio"/> Did not complete
GI Bleeding (Question 29 of 32 - Mandatory)
<input type="radio"/> Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
<input type="radio"/> Web based case simulations (Each of 2 GI Bleeding Scenarios)
<input type="radio"/> Did not complete
Pulmonary Embolism (Question 30 of 32 - Mandatory)
<input type="radio"/> Team-based care
<input type="radio"/> Web based case simulation (Post operative Complications Scenario)
<input type="radio"/> Did not complete
Cosmetic or reconstructive operation patient (Question 31 of 32 - Mandatory)
<input type="radio"/> Direct Patient Care (Minimum Review history, studies, examine patient & assist in surgery) PREFERRED
<input type="radio"/> Did not complete

Revised and approved on 5-13-13

Optional: Please record any issues with achieving these requirements during this clerkship and also describe if you had the opportunity to be involved with more than one of these Operations and/or Procedures. *(Question 32 of 32)*
