

WELCOME RESIDENTS

Dear Residents:

CONGRATULATIONS and **WELCOME** to the Department of Surgery at MUSC! We are very excited to have you join our team.

In the coming weeks, there will be several items to complete prior to beginning your residency on July 1, 2019. You can find all the forms along with a helpful checklist to keep you on track on the following site: <https://education.musc.edu/colleges/medicine/departments/surgery/education>. Please pay attention to all deadlines, as they are very important to getting you on boarded. The education team is a great resource to you during this transition so please feel free to reach out to any one of us for assistance.

All new incoming interns (categorical, preliminary and subspecialty) will be required to be ACLS/BLS certified before you start on 7/1/19. Please try to take care of this at your home school before you leave. You can also contact our Community Training Center at www.musc.edu/ctc to see when these courses are offered here but please note that their selection is **limited**. In addition, the Department will be requiring ATLS (Advanced Trauma Life Support) certification and the American College of Surgeons Fundamentals of Surgery Curriculum modules for select residents. Please refer to your checklist for this information.

Please plan to be available for orientation beginning Monday, June 17, 2019. I will forward you the final orientation schedule in the next couple of weeks.

I have a list of Real Estate Agents Approved by the Department of Surgery along with rental and buying information received from residents. Please let me know if you would want a copy of this list.

Remember, if you have any questions feel free to reach out to any member of our team.

Sincerely, Your Education Team

MEET OUR TEAM

June Cameron, MS, C-TAGME,
Director of Education
My role is to support the program directors with accreditation and faculty with development while managing the coordinators in their development and learning.
