

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

Definition and Scope of Specialty

The Internal Medicine-Pediatrics residency program is a voluntary component in the continuum of the educational process of physician training; such training may take place after satisfactory completion of medical school training. The overall goal of training in Internal Medicine and Pediatrics is to acquire proficiency in evaluating and managing adult and pediatric patients with respect to acute and chronic management of disease as well as primary care and prevention. Internal Medicine and Pediatrics training will allow graduates to acquire competency in Internal Medicine and Pediatrics with sufficient expertise to act as an independent provider in each field.

Faculty responsible for the education of residents in Internal Medicine and Pediatrics:

- Sarah Mennito, MD, MSCR, Program Director, Internal Medicine and Pediatrics
- Ashley Duckett, MD, Program Director, Internal Medicine
- David Mills, MD, Program Director, Pediatrics

Duration and Scope of Education

The Internal Medicine and Pediatrics residency program is a separately accredited residency program; however, its existence is dependent on the presence of an ACGME accredited Internal Medicine residency program as well as an ACGME accredited Pediatrics residency program. After successful completion of an Internal Medicine-Pediatrics residency, the graduate will be eligible for certification in both Internal Medicine and Pediatrics offered by the American Board of Internal Medicine and American Board of Pediatrics, respectively. The duration of training in Internal Medicine and Pediatrics is four years and typically begins in July of each year.

While the Internal Medicine and Pediatrics residents are part of a separately accredited residency program, they are expected to follow the scope of practice for Internal Medicine residents while rotating through Internal Medicine service and elective months and for Pediatrics while rotating through Pediatric service and elective months.

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

Scope of Practice for Internal Medicine Residents

PGY-1

1. The Intern will be responsible for all daily care of the patient.
2. All patients will be seen within a timely manner, once admitted to the floor, and comprehensive histories and physical exams will be written on each admitted patient.
3. The Intern will write most orders and will follow-up on patient studies and consults. Interns will review laboratory results and medication regimens daily, making necessary adjustments.
4. The Intern will discuss all admissions with the Resident.
5. Interns will present their patients to the Attending Physician and will assist and guide students in preparing and presenting patients.
6. Interns will checkout pertinent patient information and contingency plans to colleagues responsible for overnight care. The on-call Interns will write notes regarding events occurring during overnight care.
7. Interns (or students under their direction) will write daily progress notes and discharge notes.
8. Interns are expected to attend required Teaching Conferences, Grand Rounds and Morning Reports and to meet the standard of conference attendance as established by the program.
9. Interns will perform all procedures required for their patients' care with Residents immediately available to assist and supervise. All procedures are to be documented in the patient's chart. Informed Consent must be obtained prior to all non-emergent procedures. All procedures performed should be recorded in the MedHub system.
10. Interns will report all concerns and problems directly to the Resident.

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

11. No admissions are to be accepted by the Intern from Fellows, Attending Physicians, or other services. The Resident should be notified of all ICU transfers.
12. The primary housestaff team is responsible for patient care until patient handoff is complete.
13. On ambulatory rotations and in continuity clinic, PGY-1 residents present all patients directly to the attending physician and is expected to begin developing the care plan.

Scope of Practice for Internal Medicine Residents

PGY-2 – PGY-4

1. Initial care plans of care for all patients admitted to teaching services will be made by the Resident and Intern.
2. All patients admitted to the team will be seen and examined by the Resident.
3. The Resident will review daily care plans for the patients with the Intern and/or students and will lead daily work rounds with the Interns and students.
4. The Resident will assign patients to students and Interns on admission days.
5. The Resident will directly supervise the work of interns and students including all procedures.
6. The Resident will discuss all patient care plans with the Attending Physician on a daily basis during rounds. On services with Fellows, the resident will discuss all patient care plans with the Fellow and the Attending. The presence of the Fellow should not diminish the role of the Resident.
7. The Resident will identify any educational needs of the team and convey these to the Attending Physician.

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

8. The Resident will immediately notify the Attending Physician of all problems, need for invasive procedures, questions on patient care, change in the level of patient care (i.e. transfer to the ICU), deaths, and risk-management issues. The Resident will make certain that the Attending Physician or another approved supervisor is present for any procedures for which the Resident has not been deemed competent to perform without direct supervision. All procedures performed should be recorded in the MedHub system.
9. Residents are expected to provide 1-2 teaching sessions with the students each week and utilize evidence-based medicine.
10. The resident will attend required Teaching Conferences, Grand Rounds and Morning Reports whenever possible and meet the standard of attendance as established by the program.
11. Residents should assist Interns to allow rapid completion of discharge dictations.
12. Residents assume primary patient care duties when an Intern has the day off or is in clinic.
13. After patient handoff, the Resident covering the General Medicine service is responsible for all emergent consults. The Resident should call the Chief Resident and/or the Attending Physician to review the consult.
14. On ambulatory rotations and in continuity clinic, PGY 2-4 residents present all patients directly to the attending physician. The resident is expected to develop the care plan. The attending physician will directly see patients as needed.

Scope of Practice for Pediatrics Residents

General Principles

- Residents will have a broad exposure to the health care of children and substantial experience in the management of diverse pathologic conditions. This includes experience in child health supervision and those conditions commonly encountered in

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

- primary care practice. It will include experience with a wide range of acute and chronic medical conditions of pediatrics in both the inpatient and ambulatory settings.
- Preventive health care, ethical issues and discussions of the cost and benefits of diagnostic tests, procedures, and therapies will be an integral part of the residency training throughout the years of training.
 - Residency training in pediatrics will provide educational experiences that prepare residents to be competent general pediatricians able to provide comprehensive, coordinated care to a broad range of pediatric patients.
 - Residents will become sufficiently familiar with the fields of sub-specialty pediatrics to enable them to participate as team members in the care of patients with chronic and complex disorders.
 - Residents will be given the opportunity to function with other members of the health care team in both inpatient and ambulatory settings to become proficient as leaders in the organization and systematic improvement of the processes of patient care.
 - Residents will have a progressive educational experience with increasing patient care responsibility over the period of their training. Supervisory responsibilities will involve both inpatient and outpatient experiences.
 - Throughout the years of training, emphasis will be placed on enhancement of residents' competence in the medical interview, physical examination and communication and interpersonal skills.
 - Training will occur under the supervision of individual general and sub-specialty pediatric faculty with assistance from appropriate faculty from related services also providing care to infants and children.
 - Competence of residents at regular intervals will be assessed and the level of supervision by faculty will be reduced to allow for appropriately increased levels of responsibilities for teaching and supervision of other trainees.

PGY-1

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

- In both the inpatient and outpatient settings, within the goals and objectives established within each rotation / service, under the guidance of the upper-level resident and / or subspecialty fellow, and ultimately the responsible attending physician, the PGY-1 (intern):
 - Performs the initial clinical assessment and develops a problem list and initial differential diagnosis using medical records, patient history, physical examination, and baseline laboratory evaluations.
 - Develops initial plan of care to include:
 - further diagnostic evaluations
 - performance of diagnostic procedures in accordance with departmental guidelines for level of supervision required
 - therapeutic approaches
 - explanation to patient and / or family of the plan of care
 - Interprets subsequent / resultant information and changes in patient status to further narrow diagnostic assessment and adjusts the therapeutic approach as necessary.
 - Performs required therapeutic procedures in accordance with departmental guidelines for level of supervision required.
 - Develops a plan for content and timing of subsequent care / visits to health care providers.
 - Maintains documentation in a manner and time consistent with rotational / divisional / hospital expectations.
- In all aspects of care, the PGY-1 will follow ACGME mandated duty hours restrictions and timing of acceptance of new patient encounters.
- The PGY – 1 will be expected to participate in the teaching of other trainees to some extent.

PGY-2

- In both the inpatient and outpatient settings, within the goals and objectives established within each rotation / service, under the guidance of a PGY-3 or 4 (where applicable) and / or subspecialty fellow, and ultimately the responsible attending physician, the PGY-2 will, with appropriate levels of increased independence:

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

- Depending on the service / rotation, will serve either as a supervisory resident for the intern (PGY-1) or carry out the duties of the first line representative of the physician team and ensures the completion of:
 - The initial clinical assessment and development of a problem list and initial differential diagnosis using medical records, patient history, physical examination, and baseline laboratory evaluations.
 - The development of an initial plan of care to include:
 - further diagnostic evaluations
 - performance of diagnostic procedures in accordance with departmental guidelines for level of supervision required
 - therapeutic approaches
 - explanation to patient and / or family of the plan of care
 - Interprets subsequent / resultant information and changes in patient status to further narrow diagnostic assessment and adjusts the therapeutic approach as necessary.
 - Performance of required therapeutic procedures in accordance with departmental guidelines for level of supervision required, including moderate sedation under the supervision of an attending physician.
 - Development of a plan for content and timing of subsequent care / visits to health care providers.
 - Documentation in a manner and time consistent with rotational / divisional / hospital expectations.
- In all aspects of care, the PGY-2 will follow ACGME mandated duty hours restrictions and timing of acceptance of new patient encounters.
- The PGY – 2 will be expected to participate in the teaching of interns, students, and other residents to an increased extent.

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

PGY-3 – PGY-4

- In both the inpatient and outpatient settings, within the goals and objectives established within each rotation / service, under the guidance of a subspecialty fellow on those services where subspecialty fellowship training is ongoing, and ultimately the responsible attending physician, the PGY-3 or 4 will, with appropriate levels of increased independence in usually a supervisory role, ensure that those aspects of care outlined in detail for the PGY-1 and PGY-2 above are accomplished.
- It is anticipated that the PGY-3 or 4 will be exposed to and responsible for those cases that are increasingly complex and will function with greater independence while demonstrating increased responsibilities for teaching and supervision of those individuals with less experience and training.

Scope of Practice for Internal Medicine-Pediatrics Residents

- Combined Internal Medicine-Pediatric residents will perform all level-appropriate tasks expected of categorical internal medicine and categorical pediatric residents as listed above
- Med-Peds residents at all levels (PGY1-4) are expected to participate in educational offerings within the categorical Internal Medicine and Pediatrics programs including morning report, academic half day, and departmental Grand Rounds.
- Med-Peds residents at all levels are expected to participate in quarterly Med-Peds academic half day as well as the annual Med-Peds spring retreat.
- Med-Peds residents are expected to complete both the American Board of Pediatrics annual in-training exam (PGY1-4) as well as the American Board of Internal Medicine annual in-training exam (PGY2-4).
- Med-Peds residents are expected to conduct Med-Peds Noon Conference once a year (PGY2-3).
- Med-Peds residents are expected to present a Pediatrics Grand Rounds Warm Up Topic as a PGY4.

COMBINED INTERNAL MEDICINE & PEDIATRICS

Department of Medicine, Department of Pediatrics

SCOPE OF PRACTICE

PGY-1 – PGY-4

- Med-Peds residents at all levels are expected to participate in and intermittently conduct monthly Med-Peds Journal Club.
- All Med-Peds residents are encouraged to participate in the Transitional Care Elective in their PGY3 or PGY4 year.
- All Med-Peds residents are encouraged to participate in the Med-Peds Clinic Elective in their PGY3 or PGY4 year.

- Two Elected Med-Peds PGY-4 residents carry the responsibility of Internal Medicine-Pediatrics Chief Resident and will be expected to complete additional administrative and leadership tasks in conjunction with the program director.
