

Resident Vaccine Requirements Documentation required of all applicants

1. **TB Blood Test** (A Quantiferon Gold (QFTG) or TSPOT blood assay) Must be within 90 days prior to MUSC employment. MUSC does not accept TB PPD skin tests.  
This is advisable to have done ahead of time if you are coming from outside of USA.  
**\*\*IF YOU HAVE HAD A POSITIVE TB SKIN TEST,** provide documentation of the positive test results in millimeters and a chest x-ray report at the time of the positive skin test or after. You will also complete a signs and symptoms sheet to screen you for tuberculosis.
2. **VARICELLA** (Chicken Pox): documentation of 2 varicella vaccines or varicella IgG lab test is required showing immunity.
3. **MEASLES, MUMPS, RUBELLA:** TWO live vaccines after 12/31/67 or IgG lab test showing immunity required
4. **HEPATITIS B:** Three Hepatitis B vaccines or titer showing immunity
5. **TDAP:** Must have one TDAP vaccine administered over the age of 11, plus a booster within the last 10 years
6. **Influenza** (Flu) Vaccine: Annual flu vaccine documentation is required. (Usually not required in summer months, but this is dependent on influenza virus trends.
7. **COVID:** primary series required.  
Acceptable primary vaccine series
  - 2-dose Moderna monovalent (0, 4-8 weeks)
  - 2-dose Pfizer-BioNTech monovalent (0, 3-8 weeks)
  - 2-dose Novavax monovalent (0, 3-8 weeks)
  - 1-dose Janssen COVID-19 plus 1 bivalent mRNA booster dose (Moderna or Pfizer-BioNTech)
  - 1-dose bivalent mRNA COVID-19 vaccine (Moderna or Pfizer-BioNTech)
